©Vera V. Mainz and Gregory S. Girolami 1998

Puccianti, Luigi

1875 - 1952

DEGREE: PhD

DATE: 1898

PLACE: Pisa

TEACHER/RESEARCH ADVISOR: Batelli

constructed a highly sensitive spectrograph, with which he studied the infrared absorption of many compounds and attempted to correlate the spectra with molecular structure; studied the emission spectra of metals and halogens; proposed measuring the wavelength of x-rays by using a diffraction grating at large angles of incidence.
