Vortmann, Georg

1854 - 1932

DEGREE: PhD

DATE: 1884

PLACE: Vienna

TEACHER/RESEARCH ADVISOR: Lieben

published a book on the analysis of organic compounds that was for many years the standard text in the field; contributed numerous analytical methods; advocated the use of Na₂S instead of H₂S as an analytical reagent; checked, improved, and worked out many new methods for the analysis of organic compounds.
