Battelli, Angelo

1862 - 1916

DEGREE: PhD

DATE: 1884

PLACE: Turin

TEACHER/RESEARCH ADVISOR: Naccari

measured temperatures and heats of fusion of non-metallic substances, metallic conductivities and thermoelectric effects in magnetic metals, and the Thomson effect; investigated osmotic pressures, surface tensions, and physical properties of CS₂, H₂O, and alcohols, esp. their vapor pressures, critical points, and densities; studied X-rays and cathode rays; investigated the resistance of solenoids to high frequency AC currents.
