Shriner, Ralph Lloyd

1899 -

DEGREE: PhD

DATE: 1925

PLACE: Illinois

TEACHER/RESEARCH ADVISOR: Adams

with Roger Adams, determined the composition of Adams' catalyst ($\text{PtO}_2 \cdot \text{H}_2\text{O}$) for the reduction of organic compounds; investigated catalysis, waxes, phytosterols, salts of nitro-compounds, drugs, alkaloids, local anesthetics, urethans, sulfones, sulfoxides and sulfonanilides; studied mutarotation, coumaranones, flavylum salts, and anthocyanins.
