Watson, Herbert Ben

1894 - 1975

DEGREE: BSc

DATE: 1915

PLACE: Wales

TEACHER/RESEARCH ADVISOR: Orton

studied the influence of substituents on velocities of reaction and equilibria; investigated the bromination of ketones, carboxylic acids, and acyl halides; studied acid-catalyzed prototropic reactions, the ortho effect, and the relationship between dipole moments and reaction rates.

1. *Chem. Brit.* **1976**, *12*, 227-228.
